This information is provided for purchasers of the MasterAmp™ High Fidelity Long PCR Kit (MHF9220), MasterAmp™ Extra-Long DNA Polymerase Mix (QU92125, QU92500 and QU9201K) MasterAmp™ Extra-Long 2X Premixes 1-9 (MHF925A⇒I).

The MasterAmp™ Extra-Long Long DNA Polymerase mix contains protein isolated from non-hazardous bacteria. The protein presents no known threat to humans or laboratory animals. The protein solution is supplied in a 50/50 glycerol:H<sub>2</sub>O solution containing salts and a detergent. A material safety data sheet for glycerol is provided.

The premixes in the kit and premixes sold separate contain 400  $\mu$ M each dNTP, 3-7 mM MgCl<sub>2</sub> and MasterAmp™ PCR Enhancer with betaine. MSDSs are provided for the dNTP mix, and the Enhancer.

The Control Lambda DNA Template/primer tube contains oligonucleotides present at concentrations <0.1% and are not know to be hazardous.

Epicentre recommends all normal precautions be taken whenever all hazards are not known. We recommend wearing gloves and avoiding direct contact with skin and eyes when handling biochemical and chemical solutions. These materials are for research use only.
